Greschat, Karl Hans.
THE HEATING UP OF GLASS MELTING TANKS (Über das Anfahren von Glasschmelzwannen). [1963] [22]p. 10 refs.
Order from SLA $2.60 63-14058

Trans. of Glastechn[ischu] Ber[ichte] (West Germany) 1960, v. 33, no. 10, p. 370-376.

DESCRIPTORS: *Glass, *Furnaces, Heating, Design, Thermal insulation.

The forces and movements occurring during the heating up of glass melting furnaces have to be taken into account in the construction of these furnaces and especially in the development of the binding steel. In this respect several suggestions are made on the design. In addition to that, data was recently able to be collected on the improved control of the heat-up process (Materials--Ceramics, TT, v. 10, no. 5) (over)
